

The future of home entertainment in Majorca

THESE are exciting times in the world of home entertainment and the Palma-based retailer and experts, Digital Cinema, is like an Aladdin's Cave of all the latest developments within the industry. Digital Cinema offers custom entertainment integrators for "smart house" and yachting projects. And when they say Smart House it is a question of everything at the touch of a button; from music to the latest TV series and films.

Digital Cinema has a team of experts who will advise you on the best solution so that you can enjoy the best sounds and images.

"At Digital Cinema we are passionate about completing different audio-video and 'smart house' projects, searching for new challenges and finding the most suitable technology that truly adapts to each, client's needs and expectation. We offer the complete systems integration in your home, company, showroom, hotel or boat," the company says on its website.

" We are a multidisciplinary and multicultural group with experience in integrating and designing audiovisual projects, multimedia, theatres rooms, IP networks, audio multi-room, control of security systems, in-

telligent lighting control systems - all in all, customized technological solutions and engineering projects.

"We offer turnkey solutions and take responsibility for everything, from advice on which product to buy,

the design and décor of the surroundings, to the installation, integration, start-up and the personalized after sales service."
